# Peptogenic Milk Powder

## IN SUPPLEMENTAL FEEDING

There is much to be said for milk prepared with Peptogenic Milk Powder as the particular food to supplement an insufficient supply of mothers' milk.

Milk prepared with Peptogenic Milk Powder is an all-milk food; its proteids, carbohydrates and fats are derived solely from milk. All its constituents are quantitatively adjusted to the standard of the infant's natural food; and further, the proteids are presented in a form corresponding closely with the native proteids of mothers' milk in solubility, minute coagulability and digestibility. Finally, this food is closely like mothers' milk in color, taste, density and every physical property.

Milk prepared with Peptogenic Milk Powder is therefore particularly well adapted to supplement a deficient supply of breast milk, or to replace breast milk, should it become necessary to resort to bottle feeding after several months of nursing.

**FAIRCHILD BROS. & FOSTER**  
New York

### A "BALKY" LIVER

Like a lazy horse, the liver sometimes refuses to work. It needs the whip of *physiologic stimulation*.

***Chologestin***

See "New and Non-Official Remedies"

not only encourages hepatic activity, but also checks Intestinal Putrefaction and assists Pancreatic Digestion. It exercises cholagogue, antiseptic and digestive properties, and thus relieves Intestinal Dyspepsia and prevents and relieves Intestinal Auto-Intoxication.

**DOSE:** One tablespoonful, *well diluted*, after each meal.

Formula, samples and literature upon application.

**F. H. STRONG COMPANY, 58 Warren St., New York**

Supplied in twelve (12) ounce bottles only.

**A. M. A. Principles of Ethics.**

"It is equally derogatory to professional character for physicians to dispense or promote the use of secret remedies."

# Know to a Certainty!

You cannot determine the therapeutic value of a remedial agent by the sense of taste or sight or smell. One specimen of a given product may differ widely in medicinal worth from another specimen identical with it in physical appearance and bearing the self-same name upon its label. And this variation may be due not alone to differences in the process of manufacture, but also to the fact that the active constituents of crude drugs vary from season to season and are modified by habitat, by climatic influence, by methods of collecting, curing, handling, storage.

There is a way to produce therapeutic agents of definite medicinal strength. **STANDARDIZE THEM!** That way is our way. We **standardize our entire output of pharmaceutical and biological products**, chemically or physiologically, to the utmost degree possible in the present development of chemical and pharmacological knowledge. **WE WERE PIONEERS IN STANDARDIZATION**, putting forth the first assayed preparation (*"Liquor Ergotae Purificatus"*) more than thirty years ago. We championed standardization when it was ridiculed by routine and "conservative" manufacturers throughout the length and breadth of the country. We held then, as we hold to-day, that **"the value of a drug or drug preparation lies in its content of active principle."**

To place at the service of the medical profession preparations of the highest possible merit—preparations of whose quality and efficiency there shall be not a shadow of question—is the great ambition of this house.

**SPECIFY PARKE, DAVIS & CO.! Know—KNOW TO A CERTAINTY—that the agents you prescribe, administer or dispense are pure, active and of definite strength.**

---

## PARKE, DAVIS & COMPANY

Branches: New York, Chicago, St. Louis, Boston, Baltimore, New Orleans, Kansas City, Minneapolis, U.S.A.; London, Eng.; Montreal, Que.; Sydney, N.S.W.; St. Petersburg, Russia; Bombay, India; Tokio, Japan; Buenos Aires, Argentina.

A. M. A. Principles of Ethics.

"It is equally derogatory to professional character for physicians to dispense or promote the use of secret remedies."

# DIAMOND ANTISEPTICS, LILLY

YOU CAN'T MISTAKE THEM IN THE DARK

¶ The tablets are diamond shape and marked "POISON;" the bottle is of peculiar design—safeguarding users against error.

¶ Mercury Bichloride is first among the powerful germicides. The safest and best way to use it is in the form of Diamond Antiseptics, Lilly, which combine rapid solubility and certainty of germicidal action with the greatest safety possible.

Back View of Bottle  
Containing 25 Large Tablets

¶ The tablets are hand-molded and their loose texture, angular shape and large surface render them rapidly soluble.

¶ A small amount of citric acid is combined with the bichloride which prevents precipitation of insoluble mercury in neutral solutions, hard water or when in contact with albuminous liquids.

¶ Solutions of Diamond Antiseptics are permanent and act with certainty on all septic matter, even in blood, pus, serum, etc.

¶ While soft or distilled warm water is best for solutions, Diamond Antiseptics dissolve quickly in moderately hard water—an important advantage in emergencies.

¶ They are made in two sizes—LARGE and SMALL, containing 7.3 grs. and 1.82 grs. of Mercury Bichloride respectively, and three colors—White, Blue and Pink. The large tablets are supplied in bottles of 25, 100 and 1000, also in pounds. The small tablets are supplied in bottles of 100, 500 and 1000.

¶ By specifying Diamond Antiseptics, "Lilly," you will take every precaution possible against inefficiency and error. Send request for samples to Indianapolis.

# Tampons Ready for Immediate Use

POND'S TAMPONS furnish the most eligible type of local medication both for the immediate application in the consulting room and for prescription purposes.

POND'S TAMPONS are clean and aseptic.

POND'S TAMPONS give continuous and prolonged medication.

POND'S TAMPONS save the doctors' time and save their patients much inconvenience.

POND'S TAMPONS supply all the requirements of a perfect tamponade.

POND'S TAMPONS are made of the best *non-absorbent* wool, thus keeping the medication always in front and in contact with the parts intended.

POND'S TAMPONS expand in *length* as well as circumference—thus insuring support and relieving the Venous circulation and Nerve pressure.

POND'S TAMPONS have produced more favorable results than any form of Tamponade yet used.

POND'S TAMPONS are made in seven (7) medications and three (3) sizes; Large, Medium and Small and are packed six (6) Tampons of one size in a box.

Try POND'S TAMPONS and watch results.

POND'S TAMPONS are for sale by all Druggists.

# Tuberculins

We offer the following tuberculins to the profession, knowing that they will be found fully equal to any now on the market and that they are accurately standardized.

Our laboratories are open at all times to the inspection of the medical profession, and we shall be pleased to have physicians call that we may explain in detail the process of manufacture of such products as they may be interested in.

## DIAGNOSTIC TUBERCULINS.

Tuberculin—(Dilution) for Thermal reaction, 8 c. c. (1 c. c. contains 1 mg.) .....	\$ .75
Tuberculin—Purified (for Calmette's Ophthalmic reaction). 3 Capillary Pipettes, 1 per cent Solution, and Expulsion Bulb, per pkge. ....	1.00

## ALCOHOL and DRUG ADDICTIONS

I have bought Dr. Pettey's interest in the Sanitarium and will continue to conduct the business on strictly ethical lines. The method of treatment employed is based upon the original investigations of Dr. Geo. E. Pettey of Memphis, Tenn., and first published to the profession by him in 1901. (See Therapeutic Gazette, Oct. 1901.)

This method of treatment removes these addictions from the list of almost incurable diseases and renders them the most certainly and readily curable of the chronic ailments.

# A Declaration

We do not serve the laity. We make no "dope for quackery." We seek the confidence and the preference of the profession, to whom we give a "square deal"—always.

We do not *pretend* to be ethical—we *are* ethical. With us ethics is not a mask put on and off to suit the occasion. Our formulas are open, and our products ethically exploited.

See our eye-opening announcements in the *Journal of the American Medical Association* under the caption "Elements of Uncertainty in Therapeutics." They are worth reading. And send for a copy of our new "Digest of Positive Therapeutics," just off the press, enclosing ten cents in stamps if you please (this is not essential) to pay the cost of mailing. It contains over 300 pages of usable information; bound in flexible cloth.

Samples of our Council-passed Specialties will be sent on request.

## *The Original and only Genuine*

### **In Febrile Diseases**

Enables the physician to avoid the use of impure or adulterated milk during the summer months, in the treatment of febrile and all gastro-intestinal diseases. A palatable milk diet, embodying the carbohydrates and other important food elements of the malted grain, and presenting the casein in a soluble, easily assimilated form. Ensures adequate nutrition and safeguards the patient against complications that frequently arise from the use of foods that are not relished nor properly digested.

That your patients may obtain the best as well as the original and only genuine, always specify "Horlick's."

Samples sent, free and prepaid, to the profession, upon request.

**HORLICK'S MALTED MILK COMPANY,**  
Racine, Wis., U. S. A.

**A prominent physician writes us:**

**"You have struck the right  
note on the Food Question  
We have saved baby by the use  
of your Food when others failed"**

The reasons why

## **ESKAY'S Albumenized FOOD**

**"strikes the right note" in substitute feeding, is that it  
is both A MILK MODIFIER AND AN AUXILIARY FOOD**

It modifies cow's milk and makes it more digestible,  
and it supplies the right food-elements in the right  
proportions

The illustrations show the reasons for the ready digest-  
ibility of the Food, and the clinical results show the  
kind of tissues the Food makes

Illustration showing the tough,  
leathery curds of cow's milk,  
which has been coagulated by  
the addition of artificial gastric  
juice.

Illustration showing the soft,  
flocculent condition of the curd  
of cow's milk modified with  
Eskay's Food, and coagulated  
by the addition of artificial gas-  
tric juice.

## Lane Hospital Announcement

Lane Hospital has recently been enlarged, renovated, and improved. A story has been added, increasing the capacity to one hundred and seventy-five beds. The operating rooms have been remodeled and a new top-lighted and thoroughly equipped laparotomy room added. The new arrangements increase the convenience and double the capacity of the surgical department, while the same high standard of efficiency in the operating room service will be maintained as in the past.

A Maternity Department has been established, consisting of a number of well-lighted, isolated rooms, in close relation to a completely equipped delivery room.

Two Children's Wards have been opened, and particular attention will be paid to the care and nursing of children.

The Eye and Ear Department has been provided with special wards, special nurses and separate treatment rooms.

The X-Ray Department is located in the new portion of the hospital and has been provided with every convenience for examination, treatment and laboratory work. An entirely new set of the latest and most efficient apparatus has been installed.

Roof Garden. A special feature of the recent addition is a well-protected roof garden where convalescents may enjoy fresh air and sunlight and where patients may be given the benefit of outdoor treatment.

While the Faculty of Cooper Medical College acts as a medical and surgical staff to the hospital, the privileges of the institution are freely open to all regular physicians in good standing. Physicians having patients in Lane Hospital are assured of every professional courtesy.

Communications may be addressed to the resident physician.

Executive Committee,

WM. FITCH CHENEY, M. D.,  
STANLEY STILLMAN, M. D.,  
GEO. B. SOMERS, M. D.
